

EX.NO:3A**DATE:****SHELL SCRIPT****AIM:** To write a Shell script to reverse a given digit using looping statement.**PROGRAM:**

```
echo "Enter a number:"
read n
reverse=0
while [ $n -ne 0 ]; do
remainder=$((n % 10))
reverse=$((reverse * 10 + remainder))
n=$((n / 10))
done
echo "Reversed number: $reverse"
```

INPUT & OUTPUT:

```
(kali㉿kali)-[~]
$ vi rev.sh

(kali㉿kali)-[~]
$ sh rev.sh
Enter a number:
123
Reversed number: 321

(kali㉿kali)-[~]
$ sh rev.sh
Enter a number:
3453
Reversed number: 3543
```

RESULT:

Hence, reversing number using shell script is executed successfully.
