OPTIMAL

Aim:

To write a c program to implement Optimal page replacement algorithm.

ALGORITHM:

- 1. Start the process
- 2. Declare the size
- 3. Get the number of pages to be inserted
- 4. Get the value
- 5. Declare counter and stack
- 6. Select the least frequently used page by counter value
- 7. Stack them according the selection.
- 8. Display the values
- 9. Stop the process

PROGRAM:

```
#include <stdio.h>
int predict(int pages[], int frames[], int n, int index, int frameSize) {
        int res = -1, farthest = index;
        for (int i = 0; i < \text{frameSize}; i++) {
        int j;
        for (j = index; j < n; j++) {
        if (frames[i] == pages[j]) {
                if (j > farthest) {
                farthest = j;
                res = i;
                break;
        }
        if (j == n)
        return i;
        return (res == -1) ? 0 : res;
int main() {
        int frames[10], pages[30];
        int i, j, k, n, frameSize, faults = 0;
```

Guru sai Charan.D 231901501

```
int hit;
printf("Enter number of frames: ");
scanf("%d", &frameSize);
printf("Enter number of pages: ");
scanf("%d", &n);
printf("Enter reference string: ");
for (i = 0; i < n; i++)
scanf("%d", &pages[i]);
for (i = 0; i < frameSize; i++)
frames[i] = -1;
printf("\n");
for (i = 0; i < n; i++) {
hit = 0;
for (j = 0; j < \text{frameSize}; j++) \{
if (frames[j] == pages[i]) {
        hit = 1;
        break;
}
}
if (!hit) {
int empty = -1;
for (j = 0; j < frameSize; j++) {
        if (frames[j] == -1) {
        empty = j;
        break;
        }
}
if (empty != -1) {
        frames[empty] = pages[i];
} else {
        int pos = predict(pages, frames, n, i + 1, frameSize);
        frames[pos] = pages[i];
faults++;
}
for (k = 0; k < \text{frameSize}; k++) {
if (frames[k] != -1)
        printf("%d", frames[k]);
else
        printf("-1 ");
```

Guru sai Charan.D 231901501

```
}
printf("\n");
}

printf("\nTotal Page Faults = %d\n", faults);
return 0;
}
```

OUTPUT:

```
Enter number of frames: 3
Enter number of pages: 10
Enter reference string: 3

RESULT:

Hence, page faults that occur using OPTIMAL page replacement technique has been found.
